CF33/CF133

Ported Slide Gate Valve

**ITT**

ENGINEERED FOR LIFE

# CF33/CF133 Ported Slide Gate Valve

Figure C133 with energized cored packing.

Energized cored packing is standard with 6" (DN 150) and larger C33/C133 valves and all F33/F133 valves.

Fabri-Valve Figures C33 / C133 / F33 / F133 are bi-directional soft seated, slide gate valves designed for on/off service in heavy slurries. Specially designed body liners and constant contact seats minimize seat stress ensuring exceptional service life. Seats are self gasketing and are compatible with raised or flat faced, lined or unlined flanges. Figures C/F133 have a containment bonnet attached to the bottom flange to capture any discharge during cycling.

## Specifications

### Size Range

2" – 72"

### Pressure Rating

2" – 24" : 150 (10.3 bar) CWP (cold working pressure)

26" and larger are rate to customer requirement.

Designs to 360 psi (24.8 bar) are available, Consult Factory.

### Temperature Rating

2" – 72": 200°F (93°C).

Higher temperature designs are available, Refer to section "Pressure/Temperature Rating (Soft Components)".

### Flange Drilling

ANSI 125/150

## Testing

Every Fabri-Valve Figure C/F33 and C/F133 is tested prior to shipment. Testing includes a seat test and a cycling test to insure proper functioning of moving parts. Figures C133 and F133 are also body shell tested.\* Additional testing is also available. Please let us know your requirements.

\* Figures C33 and F33 seats are designed to restrict discharge in the open and closed positions (see seat test); therefore, Figures C33 and F33 are not body shell tested.

### Shell test:

Hydro test at 1.5 times the rated CWP – allowable leakage is zero

### Dual Resilient seat test:

Hydro test at 15 psi (1 bar) and rated CWP – Zero water leakage

## Available Options

- Dual Seats (STD)
- Hard Gate Material
- Nickel -TFE Coated Gate
- Epoxy Coating
- Flush Ports: Standard on C133
- Locking Devices (STD)
- E-Z Spin Handwheel
- Live Loaded Packing
- Chest Liners (STD)
- Self-Supporting Yokes
- Alternate Flange Drilling
- Bevel Gear
- Chainwheels
- Cylinder Actuators
- Electric Actuators
- Ratchet
- Extended Stems
- Gate Support Strips
- Rod Boots (STD)
- Splashguards (with oversized drain ports)

## Pressure/Temperature Ratings

The tables below are the maximum pressure/temperature ratings for the metallic components only. When checking pressure/temperature ratings, check the temperature rating and chemical compatibility of the packing material, and if applicable, the resilient

seat material. In a majority of designs, the temperature limit or the chemical compatibility of the seat and/or packing material determines the practical pressure/temperature limitations.

### Pressure/Temperature Ratings (Soft Components)

Seat Material	Support Ring/Liner Material	Maximum Pressure/Temp.
EPDM	UHMW-P	150psi/200°F
EPDM	Carbon/PTFE	150psi/280°F
Viton, Aflas	Carbon/PTFE	150psi/350°F
Buna-N	UHMW-P	150psi/200°F
Buna-N	Carbon/PTFE	150psi/280°F

## Flow Coefficients

The Cv values below represent U.S. gallons per minute 60°F water through a 100% open valve at a pressure drop of 1 psi. The metric equivalent, Kv, is the flow of water at +16°C through the valve in cubic meters per hour at a pressure drop of 1 kg/cm2. To convert Cv to Kv, multiply the Cv by 0.8569.

## Materials of Construction

Part	Materials	
	C33S and C133S	C33R and C133R
Body	Stainless grade per Customer Specification	Stainless grade or Ductile Iron per Customer Specification
Support Ring	Standard: UHMW-P	
Yoke Assembly	304 SS	Carbon steel
Replaceable Seat	Standard: EPDM	
Gate	Stainless grade per Customer Specification	
Handwheel	Cast iron <sup>2</sup>	Cast iron <sup>2</sup>
Stem Assembly / Cyl. Clamp	304 SS	304 SS/Carbon steel
Packing	Acrylic/PTFE/Silicone <sup>3</sup>	
Packing Gland	316 SS (2"-12"), Carbon Steel (14"-24" R), 316 SS (14"-24" S)	
Bonnet	SS as spec.	
Serial No. Tag	18-8 SS	
Fasteners	18-8 SS	Plated mild steel
Stem Nut <sup>1</sup>	Acid Resistant Bronze	
Grease Fitting (handwheel)	Plated mild steel	
Lanyard	18-8-SS	
Lockout Pin	304 SS <sup>4</sup>	
Rod Boot	Hypalon nylon	
Warning Tag	18-8 SS	
Stop Nut Assembly <sup>1</sup>	304 SS	304 SS/Carbon steel
Stop Nut <sup>1</sup>	304 SS	Carbon steel
Stem Cover <sup>1</sup>	304 SS	Carbon steel
Bonnet Gasket	Aramid fibers with NBR synthetic rubber	

<sup>1</sup> Handwheel and Bevel Gear

<sup>2</sup> Handwheel is Cast Iron; Bevel Gear is Carbon Steel

<sup>3</sup> Energized cored packing is standard with 6" (DN150) and larger C33/C133 valves and all F33/F133 valves.

<sup>4</sup> Valves with Cylinders have 17- 4 SS Lockout Pins

# C133 with Bevel Gear

Refer to TABLE 2 for dimensions

Figures C133 and F133 have a containment bonnet attached to the bottom flange to capture any discharge during cycling.
