

# McDANIEL

## Ammonia Gauges

Safe • Accurate • Reliable • Durable • Guaranteed

### "When Durability Matters"™

McDaniel designs and manufactures its industrial and commercial ammonia refrigeration gauges to minimize failure and to protect personnel and property.

A laminated safety glass lens is standard on all ammonia gauges (optional on models K9, E9, or G9). The use of a laminated safety glass lens, rather than plastic, provides additional safety, and will not scratch, craze, or discolor.

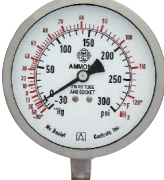

We offer ammonia gauges in dial sizes 2½ inch (63mm), 4 inch (100mm), 4½ inch (130mm), and 6 inch (160mm) in all case configurations.

For all of your demanding applications where durability, accuracy, and safety are required, choose McDaniel.

\* See website for dimensional data and downloadable AutoCAD files: [www.mcdanielcontrols.com](http://www.mcdanielcontrols.com)

**McDaniel also makes gauges in other materials; in sizes and ranges to fit a wide variety of applications, and in many special configurations.**

**Ask your representative about McDaniel gauges with brass or Monel® internals, all brass or all stainless steel gauges, test gauges, or other requirements.**

### Connection Code

Bottom connected standard (no code)

- (L) = Lower-back connected - K9, K, A, C, E, G, B, D, F, H
- (C) = Center-back connected - E9 and G9, K(special order)
- (U) = Panel, U-Clamp mounted, Lower-back connected on K9, K, A, C, E, G, B, D, F, H  
Center-back on E9 and G9
- (P) = Panel, Front Flange, Lower-back connected on K9, K, A, C, E, G, B, D, F, H  
Center-back on E9 and G9
- (R) = Rear flange for Back or Bottom connections

### HOW TO ORDER

- Select the **model number from above**
- Specify **range code** - **YNH3** = 30"Hg - 0 - 160 psi or **ZNH3** = 30"Hg - 0 - 300 psi
- Specify **connection code** (\*Not applicable on model MPB/S, bottom mount only available)
- Specify **special configurations**:  
S = Solid Front Blow-out Back (optional on K, E, G, F, H), 1/8 = 1/8 inch npt (use on K & K9)
- Add **choice of filling**, if appropriate. (GF = Glycerin Filled) (SF = Silicone Filled) (FF = Fluorolube Filled)

#### Model #

(Example: **MPB/SAYNH3** - "MPB/S" = Model, "A" = (1/4" NPT), "Y" = (30-0-160psi), "NH3" = (Ammonia Dial)  
**K9ZNH3-GF** - "K9" = Model, "Z" = (30-0-300 psi), "NH3" = (Ammonia Dial), "GF" = (Glycerin Filled))

### Warranty

McDaniel warrants our pressure gauges to be free of defects in material and workmanship. Replacement of any defective gauge will be made at no cost to the purchaser. Gauge failures determined to be caused by abuse, over-range or incompatibility with environment or process media will not be considered under this warranty.

### Repair

We will repair any McDaniel gauge for a cost of \$15.00 on 4" and larger sizes; \$7.50 on 2 1/2" and smaller. Damaged sockets or bourdon tubes cannot be repaired. Prices are F.O.B. Boutte, Louisiana, U.S.A. (Not applicable to K9, E9, or G9)

### DISTRIBUTED BY:

It is recommended that users of pressure gauges become familiar with American National Standard ASME B40.1, entitled Gauges, Pressure and Vacuum – Indicating Dial Type – Elastic Element. This specification is available from:

**American Society of Mechanical Engineers**

3 Park Avenue • New York, New York 10016
